1 **I. INTRODUCTION**

2 Defendant Precision Valve & Automation Inc.'s (hereinafter "PVA") Motion
3 for Summary Judgment must be denied because Plaintiffs produce evidence
4 demonstrating there are issues of fact, which must be determined by a jury-and not
5 by the Court on Summary Judgment. Plaintiffs' claims cannot be dismissed on
6 Summary Judgment pursuant to the Statute of Limitations defense for the following
7 reasons:

8 1. Issues of Fact Exist As To When Plaintiff Should Have Discovered
9 That His Injury Had A Wrongful Cause; and
10 2. Filing A Workers Compensation Claim Does Not Equate To A
11 Claimant Claiming That His/Her Injury Was Due To The Fault of Anyone; and
12 3. The Reason Plaintiff Filed His Workers Compensation Claim Had
13 Nothing To Do With the PVA 350 Or Any Suspicion About The PVA 350; and
14 4. Discovery Conducted ***During*** The Workers Compensation Action
15 Provided Plaintiff With A Basis To Suspect His Injury Might Have Been Caused By
16 Chemicals From The PVA 350; and
17 5. Medical Causation Does Not Equate To Knowledge Of Wrongful
18 Conduct.

19 Plaintiffs' claims cannot be dismissed on Summary Judgment pursuant to
20 Defendants' allegation that there is no evidence of a product defect for the following
21 reasons:

22 1. Inadequate Warnings on the PVA 350 and a failure to properly train
23 users on the use and dangers of the PVA 350 provide sufficient evidence to proceed
24 with a Failure to Warn claim; and
25 2. Evidence produced by Plaintiff shows that the PVA 350 is a defective
26 product because it fails the Consumer Expectations Test as well as the Risk/Benefit
27 Analysis under *Barker v. Lull Engineering* (1978) 20 Cal.3d 413..

1 **II. BRIEF FACTUAL BACKGROUND**

2 **A. THE PRODUCT**

3 The subject machine, a PVA 350, was manufactured, designed, and sold by
4 PVA Inc. [PUF 152] The purpose of the subject machine was to safely coat circuit
5 boards with a layer of coating material after which the circuit boards were to be
6 placed inside rockets. [PUF 153] The PVA 350 is a selective conformal coating
7 machine. The PVA 350 is known as a selective conformal coating machine, which
8 means a user can program the equipment to skip or avoid designated areas. [PUF
9 127] PVA 350 is not a “work cell.” [PUF 124] The PVA 350 is a standalone device,
10 which is a mechanism or system that can perform its function without the need of
11 another device, computer, or connection. In contrast, a work cell is a term used in
12 the manufacturing industry for an arrangement of resources in manufacturing to
13 improve quality, speed, and the costs of the processes. [PUF 125]

14 Each PVA model machine is different, and the PVA 350 machine does not
15 contain vital safety features for its intended purposes as on other models including a
16 conveyor belt, a heighted above-board clearance inside the machine, an exhaust
17 blower (also known as a PVA Blower), flow monitoring, additional chemical supply
18 heads, and an external on board computer and each safety measure was readily
19 available at the time the PVA 350 was manufactured. [PUF 155]

20 Based on the statements of Ruben Juarez, he was trained by PVA Inc. to put
21 his head inside the PVA 350 machine without a ventilation mask. [PUF 157] The
22 PVA manual does not warn individuals working the PVA machines to wear
23 facemasks with ventilators. [PUF 158] Further, based on the dimensions of the
24 machine, the use of the PVA 350 machine with a ventilation face mask is not
25 feasible. [PUF 159] After installing the machine, PVA Inc. continued to service the
26 machine, make modifications to the machine, and assist Space X to make
27 modifications to the machine. [PUF 161] PVA Inc. did not ensure the safety of end

1 users. [PUF 162] Indeed PVA Inc., through its continued support and maintenance
2 of the machine, knew of Space X's use of toxic sealants in the conformal coating
3 process. [PUF 163] It is the custom and practice for manufacturers to anticipate a
4 reasonable degree of misuse and take this into account in designing their product.
5 *See CACI 1245.* As such, PVA Inc. has a duty to protect end users from
6 anticipatable misuse. [PUF 164]

7 The PVA 350 is defective in design because PVA Inc. should have taken
8 steps during the manufacturing and design process to mitigate the risk of harmful
9 exposure by foreseeable use of the end users including the various available coating
10 chemicals. This could have been easily done by: (i) altering the design of the PVA
11 350 so that the interior can be monitored with cameras and/or mirrors so that the end
12 user need not place their head within the confined space; (ii) equipping the PVA 350
13 with interlocks that prevent the operation of the PVA 350 unless the ventilation
14 system is operating. (Air flow sensors are commonly used to ensure ventilation
15 systems are operating); (iii) equipping the PVA 350 with interlocks that prevent
16 opening the PVA 350 until the ventilation system has cleared the interior airspace of
17 the PVA 350 of harmful vapors. This is commonly done with timers and/or
18 chemical sensors; and, (iv) eliminating possible overriding systems of
19 bypass/interlocks at the PVA 350. [PUF 168]

20 PVA Inc. likewise failed to provide proper warnings to its end users as to the
21 use of toxic materials and proper ventilation/protection. [PUF 169] Specifically, the
22 PVA 350 failed to have an adequate warning because PVA Inc. failed to take steps
23 to warn its customers and end users that the PVA 350 machine could leak toxic
24 chemicals or exposure could occur while using the PVA 350. [PUF 170]

25 PVA Inc. knew how Space X was utilizing the machine and the chemicals
26 utilized during the conformal coating process, but PVA Inc. failed to provide
27 sufficient safety features or warn of the danger and thus the PVA 350 caused

1 dangerous and possibly life-threatening exposure and injures. [PUF 174] PVA Inc.
2 should have never sold this PVA 350 to Space X because it was involved in the
3 avionics industry which often requires the use of dangerous chemicals in the coating
4 process, but PVA Inc. sold and maintained this machine while in the service of
5 Space X with the knowledge that the end users could easily be injured. [PUF 175]

6 It was clearly foreseeable that end users such as those in the Avionics industry
7 would utilize the PVA 350 with dangerous chemicals utilized in the conformal
8 coating process, and PVA Inc. was aware of the specific chemicals being utilized by
9 Space X as stated in the emails/Declarations. [PUF 180] There should have been a
10 **stamp on the PVA 350** as well as a **hardcopy set of instructions** in the box
11 specifically warning customers not to use the PVA 350 with dangerous chemicals
12 commonly utilized in the avionics conformal coating process, or PVA should have
13 provided sufficient safety measures to ensure its safe operating conditions under
14 these circumstances. [PUF 181]

15 **B. INTERACTIONS BETWEEN SPACE X, PLAINTIFF, PVA INC.
16 AND PVA 350**

17 PVA Inc. manufactured, designed, and sold the PVA 350 to Space X in 2009.
18 [PUF 84] Ruben Juarez worked at Space X from January 2012 to May or June 2014
19 as a programmer. [PUF 89] While working at Space X, Ruben Juarez started to
20 experience various health problems including headaches. [PUF 92] A physician
21 initially suspected Mr. Juarez had vertigo and later suspected his aneurysm was the
22 cause of his condition. [PUF 94] Only after a successful surgery am 2013 and
23 subsequent checkups did Mr. Juarez realize that he had recovered from the
24 aneurysm. [PUF 95] But because Mr. Juarez' symptoms persisted, he realized the
25 aneurysm was not causing his symptoms. [PUF 96] As no one else at work was
26 sick, Mr. Juarez thought his symptoms were caused by his aneurysm or because he
27

1 was just unusually sensitive to the chemicals in the nearby chemical baths. [PUF
2 97, 111]

3 Mr. Juarez' Workers Compensation Claim was filed due to "repetitive and
4 continuous exposure to electronics parts cleaning (the chemical bath down the hall)
5 & Lead SO (the filters with the lead wiring). [PUF 98] At this time, Mr. Juarez
6 guessed that the cause of his injuries was lead solder wires and unknown chemicals
7 used in the chemical cleaning baths at the Space X facility—items and areas
8 completely unconnected to the PVA 350. [PUF 99] At the time Mr. Juarez filed his
9 Workers Compensation Claim, there were no physicians who suggested Plaintiff
10 examine all the chemicals utilized at Space X—there were no physicians telling
11 Plaintiff to avoid anything or any place at work—there was no one informing
12 Plaintiff that the PVA 350 was not working properly or that it was dangerous to
13 program the PVA 350—Plaintiff did NOT see any MSDS sheets or Manual
14 associated with the PVA 350—nor did Plaintiff see any Standard Operating
15 Procedures issued by his employer regarding the use of MSDS sheets and/or the use
16 of the PVA 350. [PUF 100]

17 During the work up of Mr. Juarez' Workers Compensation claim, he was sent
18 to see Dr. Regev. [PUF 101] Dr. Regev suggested that Mr. Juarez obtain the MSDS
19 sheets for the lead solder wire and chemical cleaning baths. [PUF 102] During this
20 appointment, Dr. Regev never indicated Mr. Juarez thought any of the chemicals he
21 was working with were dangerous, and Dr. Regev did not tell Mr. Juarez to stay
22 away from any chemicals. [PUF 104]

23 Pursuant to Dr. Regev's request (i.e. *following the doctors advice*), Plaintiff
24 requested the MSDS sheets and made an appointment with a toxicologist. [PUF
25 106] Also, Mr. Juarez called Space X and requested a list of chemicals associated
26 with the chemical bath and the filters with the lead wires, but Space X did not
27 provide Mr. Juarez with a list so Mr. Juarez called Francisco (a co-worker at Space
28

1 X) in early March of 2015 and Francisco ended up giving Mr. Juarez not only the
2 list of chemicals involved in the cleaning baths and lead wire, but also the names of
3 the chemicals that Mr. Juarez worked with when programming PVA 350. [PUF
4 107]

5 Mr. Juarez emailed Space X on March 3, 2015 asking for the MSDS sheets
6 that Francisco indicated that Mr. Juarez worked with, and on March 3, 2015, Jane
7 Malubag with Space X did not send Mr. Juarez the MSDS sheets but indicated
8 Space X's insurance would send them to Mr. Juarez' workers' compensation
9 attorneys, and on March 12, 2015 she indicated that the MSDS sheets were
10 forwarded to Mr. Juarez' attorney and insurance company. [PUF 108] After receipt
11 of the MSDS sheets, Mr. Juarez saw a toxicologist on March 25, 2015, Mr.
12 Zlotolow M.D., and provided Dr. Zlotolow with the MSDS sheets for review. [PUF
13 109] It was at the appointments with the toxicologist, starting in March of 2015 tht
14 Plaintiff was first told his reactive airways disease and rhinitis were probably caused
15 by industrial exposure on the job. [PUF 110] Only after Mr. Juarez reviewed the
16 MSDS sheets did Mr. Juarez realize that the solder wire was actually lead-free and
17 the chemical used in the chemical baths was only isopropyl alcohol. [PUF 112] Plaintiff
18 was deposed on three occasions during the Workers Compensation
19 Action—on March 30, 2015 and May 20, 2015 and October 21, 2015. [PUF 113] During
20 these depositions, counsel for Space X continued to ask questions to Plaintiff
21 about the PVA 350—the manner in which Plaintiff operated the PVA 350—the
22 training Plaintiff received about the PVA 350 and about any warnings associated
23 with the PVA 350. It was this series of questions which led Plaintiff to investigate
24 the safety of the PVA 350 and which triggered Plaintiffs actual suspicion that his
25 injury was might have been caused by defects associated with the PVA 350. [PUF
26 114]

1 For years, Mr. Juarez worked with the PVA 350 without any suspicion that
2 Space X or PVA Inc. were doing anything wrong and he was never provided the
3 manual. [PUF 130, 134 134] A new chemical, which Mr. Juarez later found out was
4 a toxic chemical, Arathane, was introduced at Space X with the assistance of PVA
5 Inc. and David Hwang replaced the original chemical, which Mr. Juarez later found
6 out was Humiseal. [PUF 139] Mr. Juarez had no formal or informal chemistry
7 training so he was not allowed to mix these chemical compounds and he was
8 unaware of toxicity of the chemicals. [PUF 135, 144]

9 **III. LEGAL STANDARD**

10 Summary judgment is appropriate only where the record, read in the light
11 most favorable to the nonmoving party, indicates that “there is no genuine issue as
12 to any material fact and ... the moving party is entitled to a judgment as a matter of
13 law.” Fed.R.Civ.P. 56(c)(2); see also *Celotex Corp. v. Catrett*, 477 U.S. 317, 323-
14 24 (1986). A fact issue is genuine “if the evidence is such that a reasonable jury
15 could return a verdict for the nonmoving party.” *Anderson*, 477 U.S. at 248. In
16 deciding a motion for summary judgment, “[t]he evidence of the non-movant is to
17 be believed, and all justifiable inferences are to be drawn in his favor.” *Anderson*,
18 477 U.S. at 255. A court does not make credibility determinations or weigh
19 conflicting evidence but rather draws all inferences in the light most favorable to the
20 nonmoving party. *Ibid.*; see also *T.W. Elec. Serv., Inc. v. Pac. Elec. Contractors*
21 *Ass'n*, 809 F.2d 626, 630-31 (9th Cir. 1987). There is a triable issue of fact if the
22 evidence would allow a reasonable trier of fact to find any material fact in favor of
23 plaintiff. *Aguilar v. Atlantic Richfield Co.*, *supra*, at 850. A Court must view the
24 evidence in the light most favorable to plaintiff and strictly scrutinize defendant's
25 evidence. *Nazir v. United Airlines* (2009) 178 Cal.App.4th 243. The Court may not
26 grant summary judgment based on inferences if contradicted by other inferences
27 which raises a triable issue as to any material fact. *Aguilar (supra)* at 856. In the
28

1 instant matter, Plaintiff produces evidence which raises triable issues of fact on the
 2 statute of limitations defense and in regard to the defectiveness of the PVA 350.
 3

4 **IV. THE STATUTE OF LIMITATIONS: PLAINTIFFS TIMELY FILED**
THEIR COMPLAINT

5 **A. Issues of Fact Exist As To When Plaintiffs Should Have Discovered**
That Their Injury Had A Wrongful Cause.

6 As to the Statute of Limitations argument put forth by PVA, the California
 7 Supreme Court in *Fox v. Ethicon Endo-Surgery, Inc.* (2005) 35 Cal. 4th 797 clearly
 8 states the delayed discovery rule and a Plaintiff's obligations as follows: "The
 9 Legislature, in codifying the discovery rule, has also required plaintiffs to pursue
 10 their claims diligently by making accrual of a cause of action contingent on when a
 11 party discovered or should have discovered that his or her injury ***had a wrongful***
 12 ***cause.***" *Fox v. Ethicon Endo-Surgery, Inc.* (2005) 35 Cal. 4th 797, 808. [Emphasis
 13 added] Furthermore, "[I]f a plaintiff's reasonable and diligent investigation
 14 discloses only one kind of wrongdoing when the injury was actually caused by the
 15 tortious conduct of a wholly different sort, the discovery rule postpones accrual of
 16 the statute of limitations on the newly discovered claim.") *Fox* (supra) @ 813. In
 17 *Nelson v. Indevus Pharmaceuticals, Inc.* (2006) 142 Cal.App.4th 1202, the court
 18 addressed the delayed discovery rule and the issue of raised suspicions. The *Nelson*
 19 court held, "***Our Supreme Court has never held that under the discovery rule, the***
 20 ***suspicion necessary to trigger the statute may be imputed to a plaintiff,*** and we do
 21 not believe that to be the law." *Nelson* (supra) at 1206. [Emphasis added].

22 Thus, California law is quite clear that the mere fact of knowledge of an
 23 injury does not result in an accrual of a cause of action. A plaintiff must have either
 24 discovered that the injury had a wrongful cause or that the plaintiff should have
 25 discovered that his injury had a wrongful cause.
 26

1 In this case, it is undisputed that Plaintiff was aware of an injury (headaches,
 2 dizziness and migraines in 2012 and an aneurysm in 2013) more than two years
 3 before he filed his Complaint on 2/28/17. But the instant motion must be denied
 4 because there are *issues of fact as to when Plaintiff discovered or should have*
 5 *discovered that his injury was caused by a wrongful act*—i.e. a defective product
 6 manufactured by PVA. Specifically, despite the fact that Plaintiff was displaying
 7 symptoms as early as 2012, there are no medical records which pre-date Plaintiffs
 8 Workers Compensation Claim (filed 9/24/14) which state (in any manner) that Mr.
 9 Juarez suspected his injuries were caused by the wrongful act of anyone¹. There are
 10 no medical records which pre-date Plaintiffs Workers Compensation Claim in which
 11 a doctor advised Plaintiff to stay away from any place, product or chemical. [PUF
 12 120] Plaintiff vehemently denies that he ever saw the MSDS sheets for his
 13 workplace prior to March 2015 and vehemently denies that he ever saw the PVA
 14 350 Manual or the Space X Standard Operating Procedure Manuals. [PUF 91, 92
 15 100]

16 **B. Filing A Workers Compensation Claim Does Not Equate To A**
 17 **Claimant Claiming That His/Her Injury Was Due To The Fault of**
 18 **Anyone.**

19 On 9/24/14, Plaintiffs filed a Workers Compensation Claim with his employer
 20 (Space X) because Plaintiff felt he was getting sick at work due to the existence of
 21 filters with lead wires at the Space X worksite and due to the existence of a chemical
 22

23

24

25 ¹ In fact, Plaintiff hoped his headaches and dizziness were going to resolve after his
 26 aneurysm surgery in 2013—i.e he did not think his headaches and dizziness would remain due to
 27 some ongoing chemical exposure. [Juarez Declaration @ Para. 3] Furthermore, to Plaintiffs
 28 knowledge, no one else at work was experiencing similar symptoms so Plaintiff did not suspect
 anyone had done anything wrong which caused harm to plaintiff. Plaintiff, at that time, merely
 thought he had his own unique medical condition. [Juarez Declaration @ Para. 3]

1 cleaning bath that was located next to Mr. Juarez' work station. [PUF 121, 122]
 2 The filters with lead wires and the cleaning baths were constructed and integrated
 3 into the Space X work place (as opposed to the many independent machines [such as
 4 the PVA 350] that were manufactured by third parties and purchased by Space X for
 5 use in the Space X building). [PUF 98, 104, 111]

6 As *California is a “no-fault” state* which allows employees to file Workers
 7 Compensation actions against their employer based on the mere fact that a worker
 8 got sick at work, the *filing of a Workers Compensation claim is not definitive*
 9 *proof that a claimant suspects his injury was due to the wrong or fault of another.*
 10 *Charles J. Vacanti, M.D., Inc. v. State Comp. Ins. Fund* (2001) 24 Cal.4th 800, 811;
 11 *Stevens v. Workers Compensation Appeals Board* (2015) 241 Cal.App.4th 1074,
 12 1087; *Gonzalez v. Workers Compensation Appeals Board* (1996) 46 Cal.App.4th
 13 1584. (“The state Constitution gives the Legislature plenary power...to create...and
 14 enforce a complete system of workers compensation...Acting under this power, the
 15 Legislature enacted the workers compensation law to govern compensation to
 16 California workers who are injured in the course of their employment...The
 17 underlying premise behind this statutorily created system...is the compensation
 18 bargain...under which the employer assumes liability for industrial personal injury
 19 or death *without regard to fault* in exchange for limitations on the amount of that
 20 liability. The employee is afforded relatively swift and certain payment of benefits
 21 to cure or relieve the effects of industrial injury without having to prove fault...”).
 22 [Emphasis added] *Charles J. Vacanti, M.D., Inc. v. State Comp. Ins. Fund* (2001) 24
 23 Cal.4th 800, 811; *Stevens v. Workers Compensation Appeals Board* (2015) 241
 24 Cal.App.4th 1074, 1087; *Gonzalez v. Workers Compensation Appeals Board* (1996)
 25 46 Cal.App.4th 1584.

26 Thus, the mere filing of Plaintiff’s Workers Compensation Claim on 9/24/14
 27 does not equate to any admission that Plaintiff suspected his injury was caused by
 28

1 the wrongful conduct of his employer or any third party. In fact, Plaintiff's conduct
 2 in filing his Workers Compensation Claim is exactly what the State of California
 3 encourages citizens to do if they get injured at work—file a Workers Compensation
 4 Claim for quick relief.

5 **C. The Reason Plaintiff Filed His Workers Compensation Claim Had**
 6 **Nothing To Do With the PVA 350 Or Any Suspicion About The PVA**
 7 **350**

8 “[I]f a plaintiff's reasonable and diligent investigation discloses only one kind
 9 of wrongdoing when the injury was actually caused by tortious conduct of a wholly
 10 different sort, the discovery rule postpones accrual of the statute of limitations on
 11 the newly discovered claim.” *Fox v. Ethicon Endo-Surgery* (supra) @ 813.

12 As the Workers Compensation Claim Form shows, and as the testimonial
 13 evidence submitted by Plaintiff shows, the Workers Compensation Claim was filed
 14 due to “repetitive and continuous exposure to electronics parts cleaning (the
 15 chemical bath down the hall) & Lead SO (the filters with the lead wiring). [PUF 98]
 16 This evidence shows that Plaintiff did not have an actual suspicion when he filed his
 17 Workers Compensation Claim that the PVA 350 was actually causing plaintiffs
 18 injury and it shows that (prior to filing his Workers Compensation Claim) Plaintiff
 19 never thought or alleged that there was something wrong with the PVA 350 which
 20 caused Plaintiff injury. [PUF] Just because Plaintiff suspected that the chemical
 21 bath implemented by his employer (Space X) and/or the lead wiring (also
 22 implemented by Space X) might have been causing him injury does not equate to
 23 Plaintiff being aware of facts that demonstrated that the PVA 350 was the cause of
 24 injury due to PVA doing something wrong with its product. [PUF 113, 114]

25 There simply was nothing on Plaintiffs’ “radar screen” at the time he filed his
 26 Workers Compensation Claim that would have provided Plaintiff with facts to cause
 27 him to investigate the PVA 350—i.e. there were no physicians who suggested
 28

1 Plaintiff examine all the chemicals utilized at Space X—there were no physicians
 2 telling Plaintiff to avoid anything or any place at work—there was no one informing
 3 Plaintiff that the PVA 350 was not working properly or that it was dangerous to
 4 program the PVA 350—Plaintiff did NOT see any MSDS sheets or Manual
 5 associated with the PVA 350—nor did Plaintiff see any Standard Operating
 6 Procedures issued by his employer regarding the use of MSDS sheets and/or the use
 7 of the PVA 350². [PUF 99]

8 **D. Discovery Conducted During The Workers Compensation Action**
 9 **Provided Plaintiff With A Basis To Suspect His Injury Might Have**
 10 **Been Caused By Chemicals From The PVA 350**

11 As PVA lacks any evidence of Plaintiffs actual suspicion (more than two
 12 years before the filing of the Complaint on 2/28/17) that Plaintiffs' injuries were
 13 caused by a wrong committed by PVA, the California Supreme Court in *Fox v.*
 14 *Ethicon Endo-Surgery, Inc.* (2005) 35 Cal. 4th 797 provides California Plaintiffs
 15 with their legal obligations when a Plaintiff should have discovered that his or her
 16 injury had a wrongful cause.

17 “In other words, Plaintiffs are required to *conduct a reasonable investigation*
 18 after becoming aware of an injury, and are *charged with knowledge* of the
 19 information that would have been *revealed by such a [reasonable] investigation.*”
 20 *Fox v. Ethicon Endo-Surgery, Inc.* (2005) 35 Cal. 4th 797, 808. [Emphasis added]

21
 22 _____
 23
 24 ² There is a multitude of independent “stand alone” devices located at the Space
 25 X work site. [PUF 124-126] It is a question of fact to be determined by a jury as to
 26 whether a person “in plaintiffs’ shoes” should have investigated *every machine and*
device at Space X based upon Plaintiffs knowledge of the fact that he was
 27 experiencing headache and dizziness symptoms and he was around many different
 28 types of machines and devices at his work place.

1 The issue of “what constitutes a reasonable investigation” and “what a
 2 reasonable investigation would have revealed”—as well as to when Plaintiffs should
 3 have discovered their injuries were caused by a wrong—is generally a question of
 4 fact for a jury to determine. *Fox v. Ethicon Endo-Surgery, Inc.* (2005) 35 Cal. 4th
 5 797.

6 In this case, the evidence shows that up to the time of filing his Workers
 7 Compensation Claim, Plaintiff had been seen by multiple physicians and none of
 8 them told Plaintiff his injuries were caused, or might have been caused, by
 9 chemicals at his workplace and that he should avoid those chemicals. [PUF 93, 99,
 10 100]

11 But during the discovery phase in the Workers Compensation claim, Plaintiff
 12 went to see Dr. Isaac Regev. [PUF 99, 100] In the “DISCUSSION” portion of the
 13 Regev Medical Records, Dr. Regev confirms Plaintiffs History by noting that: “The
 14 patient relates of frequent headaches at work and he believed they were associated
 15 with chemicals to clean electrical parts [the chemical baths down the hall]. He also
 16 believes he was exposed to lead [the filters with the lead wiring in the building].
 17 [PUF 104] But Dr. Regev did not stop there. Dr. Regev then advised that Plaintiff
 18 see a toxicologist and obtain the MSDS sheets from Space X so a toxicologist could
 19 review said sheets and advise Plaintiff. [PUF 105-109] “I suggest the patient be
 20 seen by a toxicologist with the MSDS and working environment analysis.” [PUF
 21 104]

22 Under *Fox* (supra), Dr. Regev’s advice now triggered Plaintiff to commence a
 23 reasonable investigation to obtain the MSDS sheets from his employer and to take
 24 them to a toxicologist³. This is EXACTLY WHAT PLAINTIFF DID. Promptly

25
 26
 27 ³ Prior to seeing Dr. Regev, there was no physician who advised Plaintiff to investigate the
 28 chemicals in the chemical baths and lead wires. Thus, prior to seeing Dr. Regev, Plaintiff’s

1 after seeing Dr. Regev, Plaintiff contacted Space X and asked for the MSDS sheets
 2 from his working environment. [PUF 106] Unfortunately, the administrative
 3 personnel at Space X did not promptly respond to Plaintiffs request for the MSDS
 4 sheets. [PUF 106] So, Plaintiff then contacted his co-worker (Francisco) who mixed
 5 the chemicals at Space X and asked Francisco to get Plaintiff the MSDS Sheets from
 6 Space X. [PUF 106] Instead of sending Plaintiff the MSDS sheets, Francisco told
 7 Plaintiff over the phone the products and MSDS sheets to ask for from Space X.
 8 [PUF 106] This all took time. On March 3, 2015, Plaintiff sent an email to Space X
 9 asking for the MSDS sheets that Francisco told Plaintiff to ask for. Space X did not,
 10 however, send the MSDS sheets directly to Plaintiff but instead sent them to
 11 Workers Compensation Counsel for Plaintiff. [PUF 107] Finally, Plaintiff obtained
 12 the MSDS sheets in time for his first appointment with the toxicologist (Dr. Ronald
 13 Zlotolow) on March 25, 2015. [PUF 108] It was at this appointment, that Plaintiff
 14 was first told his reactive airways disease and rhinitis were probably caused by
 15 industrial exposure on the job [PUF 109]. Thus, the reasonable results of Plaintiffs'
 16 investigation into any causal connection between his workplace on some of his
 17 symptoms occurred—AT THE EARLIEST ON MARCH 25, 2015⁴. [PUF 108]
 18 Thus, Plaintiff timely filed his Complaint on 2/28/17—less than two years after the
 19

 20
 21
 22
 23
 24
 25
 26
 27
 28

“reasonable investigation” based on his fact of injury resulted in Plaintiff being told he had symptoms but no physician connected the symptoms to any chemical exposure at work. [PUF] The “reasonable investigation” broadened when Dr. Regev told Plaintiff to get the MSDS Sheets and see a toxicologist. [PUF 105-106]

⁴ Issues of fact exist as to whether the reasonable results of the reasonable investigation would be found by the jury to be 3/3/15 (when Plaintiff asks for the MSDS sheets from Space X) or on the date after 3/3/15 (when Plaintiff or his attorney actually received the MSDS Sheets) or on 3/25/15 (when Plaintiff reviewed the MSDS sheets with Dr. Zlotolow). [PUF 105-109] All of these dates make the two year period for the Statute of Limitations as the Complaint was filed on 2/28/17.

1 product of his reasonable investigation occurred in March of 2015. [PUF 106-109,
 2 182]

3 **E. Medical Causation Does Not Equate To Knowledge Of Wrongful**
 4 **Conduct**

5 All of the aforementioned evidence from the MSDS Sheets and from the
 6 medical records just speaks to Plaintiffs subjective (or legally imposed objective)
 7 knowledge about a potential causal connection between some chemicals at work and
 8 some of Plaintiffs symptoms. But said medical causation evidence does not equate
 9 to Plaintiffs knowledge or suspicion that there was something wrong with the PVA
 10 350—i.e. that it was defective in any manner. Just because a chemical might be
 11 listed as an agent that can cause harm to a human being does not mean that said
 12 chemical is reaching said human being due to someone's wrongful conduct. For the
 13 cause of action to truly accrue, plaintiff had to be aware of some facts which would
 14 have led him to believe/suspect that the causative chemicals were reaching plaintiff
 15 due to something being wrong with the PVS 350 device.⁵ As it turns out, that
 16 suspicion arose during the discovery process in the Workers Compensation Action.

17 Plaintiff was deposed on three occasions during the Workers Compensation
 18 Action—on March 30, 2015 and May 20, 2015 and October 21, 2015. [PUF 113]
 19 During these depositions, counsel for Space X continued to ask questions to Plaintiff
 20 about the PVA 350—the manner in which Plaintiff operated the PVA 350—the
 21 training Plaintiff received about the PVA 350 and about any warnings associated
 22 with the PVA 350. [PUF 113] It was this series of questions which led Plaintiff to
 23 investigate the safety of the PVA 350 and which triggered Plaintiffs actual suspicion
 24 that his injury was might have been caused by defects associated with the PVA 350.

25
 26
 27 ⁵ The PVA 350 device was not the only “stand alone device” provided by a third party to
 28 Space X which is used at the huge Space X facility. [PUF]

1 [PUF 114] This element of a cause of action—suspicion of a wrong—did not arise
 2 until the earliest deposition on 3/30/15---less than two years before the Complaint
 3 was filed on 2/28/17. [PUF 114, 182]

4 As shown above, there are questions of fact as to when Plaintiffs causes of
 5 action accrued as to Plaintiffs claims against PVA. There certainly is evidence that
 6 would support a reasonably jury finding that said cause of action accrued in March
 7 of 2015. [PUF 114] Therefore, since Plaintiff filed his Complaint in February
 8 2017, Plaintiff timely filed his Complaint against PVA and the instant motion must
 9 be denied on that basis.

10 **F. DEFENDANT'S CASES ARE NOT CONTROLLING.**

11 Defendant's motion cites a series of cases interpreting the delayed discovery
 12 rule, which are similarly distinguishable. Specifically, Defendant cites *Gonzales v.*
 13 *Texaco* 2007 4044319, *7 (Cal. Ct. App. 2007), which is dissimilar to the facts
 14 asserted by Mr. Juarez because in *Gonzales* the plaintiff was told by a doctor her
 15 cervical cancer was caused by Texaco's oil extraction activities; no similar
 16 conveyance was made to Mr. Juarez until March of 2015. [PUF]

17 Defendant has failed to met its burden of showing a prima facie case showing
 18 nonexistence of any triable issue of material fact because only then does the burden
 19 shift to opposing party to show a trial issue of material fact. *See NBC Universal*
 20 *Medial LLC v. Superior Court*, 225 Cal. App. 4th 1222, 1232 (2014). Defendant
 21 fails to met its burden because defendant may not rewrite the First Amended
 22 Complaint, which clearly alleges Plaintiff did not have a reasonable suspicion until
 23 the MSDS sheets were provided by Space X in 2015 within the two year statute of
 24 limitations period. As stated in *Jolly v. Eli Lilly & Co.*, 44 Cal. 3d 1103, 1112
 25 (1988), "plaintiffs who file suit as soon as they have reason to believe that they are
 26 entitled to recourse will not be precluded" and upon receipt of the MSDS sheets and
 27 seeing a toxicologist Mr. Juarez had a reasonable suspicion of a wrongdoing as

1 stated in the First Amended Complaint, but he did not know about the defects in the
2 PVA 350 until the Worker's Compensation depositions. [PUF 113, 114]

3 Mr. Juarez was not put on notice of the toxicity of the chemicals he was
4 working with, which distinguishes the line of chemical cases and notice cases cited
5 by the defendant. [PUF 135, 144] In *McCoy v. Gustafson*, 180 Cal. App. 4th 56,
6 109 (2009), the court indicated the Plaintiffs had a duty to investigate after the
7 Plaintiffs received specific notice of the condition of the soil in a purchase
8 agreement and thus had notice (unlike Mr. Juarez who did not receive the MSDS
9 sheets until these were provided by Space X in March 2015). [PUF 109] Similarly,
10 defendant also cites the unreported opinion of *Treatt USA v. Superior Court* 2015
11 WL 5895495 (Cal. Ct. App. 2015) where the plaintiff sued the chemical
12 manufacturers and suppliers of toxic food flavoring chemical, and the plaintiff was
13 specifically diagnosed with a disease related to the chemicals, which is dissimilar to
14 Mr. Juarez's cause of action which is asserted against a product manufacturer not
15 the chemical manufacturer. Upon Mr. Juarez discovering the toxicity of the
16 chemicals utilized with the PVA Inc. after receiving the MSDS sheets, being
17 interrogated about the PVA 350 during his Workers' Compensation depositions,
18 and filed an action and the discovery process has revealed the PVA 350 was
19 defective and PVA Inc. was negligent. [PUF 90-92, 113, 114] As such, this case
20 and the Defendant's line of chemical cases are specifically inapplicable.

21 Along this same rationale, *Rivas v. Safety-Kleen Corp.*, 98 Cal. App. 4th 218
22 (2002) is similarly distinguishable because in *Rivas* the Plaintiff sued a chemical
23 manufacturer, the doctor asked for a list of chemicals, and the doctor specifically
24 told the Plaintiff to stay away from a specific chemical and the Plaintiff failed to act
25 diligently. This is completely different from the actions of Mr. Juarez who upon
26 request by a doctor diligently sought out the MSDS sheets, received the MSDS
27 sheets in March 2015, and saw a toxicologist in March of 2015 thereby starting the

1 process of uncovering facts of the defective product and timely filing his action
 2 within 2 years of obtaining said causation facts. [PUF 106-112] Along this similar
 3 rational both *Norgart v. Upjohn Co.*, 21 Cal. 4th 383 (1999) and *Miller v. Lakeside*
 4 *Village Condominium Assn.*, 1 Cal. App. 4th 1611, (1991) are inapposite because, in
 5 both cases, the Plaintiffs were aware of the toxicity and the cause of their injuries
 6 unlike Mr. Juarez' product defect and negligence actions, which is one step removed
 7 because the defects in the product were not uncovered until after the MSDS sheets
 8 were uncovered in March of 2015 and Plaintiff sat for his worker's compensation
 9 damages. [PUF 106-112]

10 Although *Rosas v. BASF Corp.*, 236 Cal. App. 4th 1378, 1399 (2015) is a
 11 case where the Plaintiff is suing the manufacturers and sellers of chemicals, the case
 12 does indicate: ***[a] rule of law that places on any sick individual the burden of***
 13 ***sharing with his or her doctor any suspicion, whether well formed or not, is not***
 14 ***yet embodied in California law, and we are not willing to go that far. Instead, we***
 15 ***hold that when a reasonable person would not necessarily suspect wrongdoing, it***
 16 ***is not a plaintiff's burden to begin an investigation until the objective facts***
 17 ***establish a reason to investigate.***” Simply put, when Mr. Juarez' doctor requested
 18 the MSDS sheets, Mr. Juarez provided these sheets upon receipt and met with a
 19 toxicologist. However, the failure of his doctors to request that information earlier
 20 does not create a lack of diligence on the behalf of Mr. Juarez. Plaintiff acted upon
 21 receipt of the MSDS sheets to meet with the toxicologist and filed his claim within
 22 the two year statute of limitation. [PUF 106-113]

23 Defendant's reliance on the unreported case of *Heimuli v. Lilja*, 2012 WL
 24 25208907 *6 (Cal. Ct. App. 2012) by arguing that Plaintiff was not diligent and that
 25 the advice of attorneys does not toll the statute of limitations is inapplicable because
 26 Plaintiff herein filed his Complaint within two years of meeting with the
 27 toxicologist with the MSDS sheets on March 25, 2015. [PUF 182]

1 Additionally, Mr. Juarez is not suing his employer and thus the string of cases
 2 such as *Nguyen v. Western Digital Corp.*, 229 Cal. App. 4th 1522, 1529 (2014)
 3 where the subsequent toxic exposure action is asserted against the employers is
 4 inapplicable. Plaintiff herein is suing a third party: PVA for a defective stand alone
 5 machine that was in a large work space at Space X amongst a multitude of other
 6 stand alone machines. Similarly, Mr. Juarez is not seeking to toll the statute of
 7 limitations based on English not being his first language as set forth in *Tsaturyan v.*
 8 *GlaxoSmithKline LLC*, 2018 WL 1789379 * 6, (Cal. Ct. App. 2018). Further, the
 9 cases that find the tolling ceased at the notice of a “environmental concerns” are
 10 dissimilar because the Plaintiffs in those cases were provided with notice of the
 11 hazard in the development and purchase of land whereas Plaintiff herein was not
 12 provided with notice of any hazard before Plaintiff obtained the MSDS sheets. *See*
 13 *Alexander v. Exxon Mobil*, 219 Cal. App. 4th 1236 (2013).

14 **V. THE PVA 350 IS A DEFECTIVE PRODUCT**

15 **A. DEFENDANT’S PARTIAL SUMMARY JUDGMENT SHOULD BE**
 16 **DENIED ON PLAINTIFFS’ FAILURE TO WARN CLAIM**

17 *Plaintiffs’ evidence supporting Plaintiffs’ failure to warn claim is set forth*
 18 *in the declaration of Glen Stevick. [PUF 169-171, 180-181]* A manufacturer “has a
 19 duty to use reasonable care to give warning of the dangerous condition of the
 20 product or of facts which make it likely to be dangerous to those whom he should
 21 expect to use the product or be endangered by its probable use, if the manufacturer
 22 has reason to believe that they will not realize its dangerous condition.” *Putensen v.*
 23 *Clay Adams, Inc.* (1970) 12 Cal. App. 3d 1062, 1076-1077. The duty to warn is not
 24 limited to unreasonably dangerous products. Rather, directions or warnings are in
 25 order where reasonably required to prevent the use of a product from becoming
 26 unreasonably dangerous. *Gonzales v. Carmenita Ford Truck Sales Inc.* (1987) 192
 27 Cal. App. 3d 1143, 1151. It is the lack of such a warning which renders a product
 28

1 unreasonably dangerous and therefore defective. *Id.* “[T]he law...requires a
 2 *manufacturer to foresee some degree of misuse and abuse of his product, either*
 3 *by the user or by third parties, and to take reasonable precautions to minimize the*
 4 *harm that may result from misuse and abuse.”* *Wright v. Stang Manufacturing Co.*
 5 (1997) 54 Cal. App. 4th 1218, 1235. [T]he extent to which designers and
 6 manufacturers of dangerous machinery are required to anticipate safety neglect
 7 presents an issue of fact. *See Id.* In most cases, *the adequacy of a warning is a*
 8 *question of fact for the jury.* *See Jackson v. Deft, Inc.* (1990) 223 Cal.App.3d 1305,
 9 1320.; See CACI Jury Instruction 1205. *The PVA 350 is defective as set forth in*
 10 *the declaration of Glen Stevick. [PUF 169-171, 180-181]*

11 Defendant's line of cases are inapplicable. First, *Temple v. Velcro USA Inc.*
 12 148 Cal.App. 3d 1090 (1983), is inapplicable because the PVA 350 did not have a
 13 clear warning and only warned of the hazard of voltage unlike the warning in
 14 *Temple* that provided an extensive and detailed warning. Second, *Contois v.*
 15 *Aluminum Precision Products Inc.*, 2008 WL 5065108, * 4 (Cal. Ct. App. 2008) is
 16 inapplicable PVA Inc. did have an inadequate warning on the machine and the
 17 company inadequately trained Mr. Juarez on how to utilize the machine without
 18 providing a sufficient warning unlike the Plaintiff in *Contois* who did not read any
 19 warnings. [PUF 85-87, 132, 156] Third, Mr. Juarez is not alleging a failure to warn
 20 because the warning was not written in a foreign language and thus *Ramirez v.*
 21 *Plough Inc.* 6 Cal. 4th 539, 544 (1993) and *Hart v. Robert Bosch Tool Corp.* 2010
 22 WL 3566715, * 5(Cal. Ct. App. 2010) are inapplicable. Fourth, Plaintiff pled facts
 23 sufficient to show the statute of limitations tolled in the First Amended Complaint
 24 so *Navajo Nation v. U.S. Forest Service* 535 F. 3d 1058 (2008) is similarly
 25 inapplicable. [PUF 169-171, 180-181]

B. NEGLIGENCE FAILURE TO WARN

A manufacturer/seller of a product is under a duty to exercise reasonable care in its design so that it can be safely used as intended by its buyer/consumer, and this duty extends to all persons within the range of the potential danger. *See Williams v. Beechnut Nutrition Corp.* (1986) 185 Cal. App. 3d 135, 141. “[W]here an article is either inherently dangerous or reasonably certain to place life and limb in peril when negligently made, a manufacturer owes a duty of care to those who are the ultimate users.” *Reynolds v. Natural Gas Equipment, Inc.* (1960) 184 Cal.App.2d 724, 736. “*This duty requires reasonable care to be exercised in assembling component parts and inspecting and testing them before the product leaves the plant.*” *Id.* Negligence law in a failure-to-warn case requires a Plaintiff prove that distributor did not warn of a particular risk for reasons which fell below the acceptable standard of care, i.e., what a reasonably prudent manufacturer would have known and warned about. *Chavez v. Clock Inc.* (2012) 207 Cal. App. 4th 1283, 1305. *As set forth in the declaration of Glen Stevick, PVA Inc. negligently failed to warn. [PUF 172-181]*

C. STRICT LIABILITY FAILURE TO WARN

In most cases, *the adequacy of a warning is a question of fact for the jury*. See *Jackson v. Deft, Inc.* (1990) 223 Cal.App.3d 1305, 1320.; See CACI Jury Instruction 1205. “Our law recognizes that even “a product flawlessly designed and produced may nevertheless possess such risks to the user without a suitable warning that it becomes ‘defective’ simply by the absence of a warning.” *Taylor v. Elliott Turbomachinery Co., Inc.* (2009) 171 Cal.App.4th 564, 577. Thus, manufacturers have a duty to warn consumers about the hazards inherent in their products. *Id.* The purpose of requiring adequate warnings is to inform consumers about a product's hazards and faults of which they are unaware, so that the consumer may then either refrain from using the product altogether or avoid the danger by careful use.” *Id.*

1 A duty to warn or disclose danger arises when an article is or should be
 2 known to be dangerous for its intended use, either inherently or because of defects.”
 3 *See DeLeon v. Commercial Manufacturing and Supply Co.* (1983) 148 Cal.App.3d
 4 336, 343. “[T]he duty to warn is not conditioned upon [actual or constructive]
 5 knowledge [of a danger] where the defectiveness of a product depends ***on the***
 6 ***adequacy of instructions furnished by the supplier which are essential to the***
 7 ***assembly and use of its product.*** *Midgley v. S.S. Kresge Co.* (1976) 55 Cal. App.
 8 3d 67, 74. [T]he warning requirement is not limited to unreasonably or unavoidably
 9 dangerous products. *Gonzales v. Carmenita Ford Truck Sales Inc.* (1987) 192 Cal.
 10 App. 3d 1143, 1151. Rather, ***directions or warnings are in order where reasonably***
 11 ***required to prevent the use of a product from becoming unreasonably dangerous.***
 12 *Id.*

13 “[T]he law now requires a ***manufacturer to foresee some degree of misuse***
 14 ***and abuse of his product, either by the user or by third parties, and to take***
 15 ***reasonable precautions to minimize the harm that may result from misuse and***
 16 ***abuse.*** *Wright v. Stang Manufacturing Co.* (1997) 54 Cal. App. 4th 1218, 1235.
 17 [T]he extent to which designers and manufacturers of dangerous machinery are
 18 required to anticipate safety neglect presents an issue of fact. *See Id.*

19 California law [CACI 1205] shows: “Two types of warnings may be given. If
 20 the product’s dangers may be avoided or mitigated by proper use of the product, the
 21 manufacturer may be required adequately to instruct the consumer as to how the
 22 product should be used.” *Buckner v. Milwaukee Electric Tool Corp.* (2013) 222
 23 Cal.App.4th 522, 532. The other type of warning to be given is to warn about the
 24 foreseeable risks and hazards in use of the product. *DeLeon v. Commercial*
 25 *Manufacturing and Supply Co.* (1983) 148 Cal.App.3d 336. Additionally, “[T]he
 26 law now requires the manufacturer to foresee some degree of misuse and abuse of
 27 his product, either by the user or by third parties, and to take reasonable precautions

1 to minimize the harm that may result from misuse and abuse...the extent to which
 2 designers and manufacturers are required to anticipate safety neglect presents an
 3 issue of fact...a manufacturer owes a foreseeable user of its product a duty to warn
 4 of risks of using the product. *Wright v. Stang Manufacturing Co.* (1997) 54
 5 Cal.App.4th 1218. The adequacy of a warning is a question of fact for the jury.
 6 *Jackson v. Deft, Inc.* (1990) 223 Cal.App.3d 1305. ***As set forth in the declaration
 7 of Glen Stevick, the evidence cited herein there is a failure to warn. [PUF 169-
 8 171, 180-181]***

9 **D. DEFENDANT'S MOTION FOR A PARTIAL SUMMARY
 10 JUDGMENT FOR A STRICT PRODUCT LIABILITY ACTION
 11 SHOULD BE DENIED.**

12 Defendant's motion for summary judgment for strict liability should be
 13 denied because the product was defective, PVA Inc. continued to service and
 14 modify the equipment, and the misuse of the machine was foreseeable. [PUF 132,
 15 165, 168, 176] In the seminal case of *Barker v. Lull Engineering* (1978) 20 Cal. 3d.
 16 413, the California Supreme Court established two alternative tests for determining
 17 whether a product was defectively designed including the Consumer Expectation
 18 Test and the Risk/Benefit Test.

19 **E. CONSUMER EXPECTATION TEST**

20 A product may be found defective in design if the plaintiff demonstrates that
 21 the product "failed to perform as safely as an ordinary consumer would expect when
 22 used in an intended or reasonably foreseeable manner." *Barker v. Lull Engineering*
 23 (1978) 20 Cal. 3d 413, 429. The consumer expectation test recognizes that "implicit
 24 in a product's presence on the market is a representation that it is fit to do safely the
 25 job for which it was intended. The consumer expectation test recognizes that
 26 "implicit in a product's presence on the market is a representation that it is fit to do

1 safely the job for which it was intended. If the facts permit an inference that the
 2 product at issue is one about which consumers may for minimum safety assumptions
 3 in the context of a particular accident, then it is enough for a plaintiff, proceeding
 4 under the consumer expectation test, to show the circumstances of the accident and
 5 the objective features of the product where relevant to an evaluation of its safety,
 6 leaving it to the fact finder to employ its own sense of whether the product meets
 7 ordinary expectations as to its safety under the circumstances presented by the
 8 evidence.” *Pannu v. Land Rover North America, Inc.* (2011) 191 Cal.App.4th 1298,
 9 1309 citing *McCabe v. American Honda Motor Co.* (2002) 100 Cal. App. 4th 1115,
 10 1120-1121. Specialized groups of consumers have also been afforded protections
 11 under the consumer expectation test. When assessing what a reasonable consumer
 12 expectation is in a specialized group of users this is appropriate to consider expert
 13 testimony. *McCabe v. American Honda Motor Co.* (2002) 100 Cal. App. 4th 1115,
 14 1120. ***As set forth in the declaration of Glen Stevick, the PVA 350 fails the***
 15 ***consumer expectation test. [PUF 164]***

16 **F. RISK BENEFIT TEST**

17 CACI 1204 provides the elements of the Risk/Benefit Test.⁶ To make a prima
 18 facie case, the plaintiff has the initial burden of producing evidence that he or she
 19 was injured while the product was being used in an intended or reasonably
 20 foreseeable manner. If this prima facie burden is met, the burden of proof shifts to
 21

22
 23 ⁶ Plaintiffs must prove 1. Defendants manufactured/distributed/sold the product; 2. Plaintiff
 24 was harmed; and 3. That the product design was a substantial factor in causing harm to Plaintiff.
 25 If Plaintiffs are successful in proving these three elements, the burden switches to Defendant to
 26 prove that the benefits of the product’s design outweigh the risks of the design. In deciding
 27 whether the benefits outweigh the risks, the jury will consider the following: (a) the gravity of the
 28 potential harm resulting from the use of the product, (b) the likelihood of an alternative safer
 design at the time of manufacture, (c) the feasibility of an alternative safer design at the time of
 manufacture, (d) the cost of an alternative design, (e) the disadvantages of an alternative design,
 and (f) other relevant factors. See CACI 1204

1 the defendant to prove that the plaintiff's injury resulted from a misuse of the
2 product. *See Perez v. VAS S.p.A.* (2010) 188 Cal.App.4th 658, 678.

3 Additionally, the line of cases cited by the defendant are factually
4 distinguishable. In *Johnson v America Standard Inc.* 43 Cal. 4th 56, 61-62 (2008),
5 the Plaintiff indicated he had reviewed the MSDS sheets unlike Mr. Juarez, who did
6 not get the MSDS sheets until after Space X sent the MSDS sheets in March of
7 2015. [PUF 106-113] The defects in the PVA 350 created the danger so *Shields v.*
8 *Hennessy Industries Inc.* 205 Cal. App. 4th 782 (2012) is inapplicable. "Under the
9 component parts doctrine, the supplier of a product component is not liable for
10 injuries caused by the finished product unless: (1) ***the component itself was***
11 ***defective and caused injury*** or (2) the supplier participated in integrating the
12 component into a product, the integration caused the product to be defective, and
13 that defect caused injury." *Webb v. Special Elec. Co. Inc.* (2016) 63 Cal.4th 167, 183.
14 *Tellez-Cordova v. Campbell-Hausfeld* (2004) 129 Cal. App. 4th 577. Here, ***PVA***
15 ***Inc. created the defective PVA 350 and fails the Risk Benefit Test as set forth in***
16 ***the declaration of Glen Stevick. [PUF154-176, 180]***

17 **VI. CONCLUSION**

18 For the foregoing reasons, PVA's Motion For Summary Judgment should be
19 denied.

20 DATED: SEPTEMBER 10, 2018
